

Past Event Recap

Innovent Tour, February 2015

Our first IIE Twin Cities event of 2015 was a huge success! With a large turnout of 31 attendees, consisting of both students and business professionals, the plant manager and three Industrial Engineers gave a presentation and facility tour of Innovent, a unique HVAC solutions company. During the presentation, we heard from the IE's that work at Innovent, and they explained how they have been able to apply their knowledge and education to their everyday job.

As we toured the facility, we saw how IE concepts were abundant in the work done at Innovent. With the rapid growth of the company, IE's have their hands full looking for ways to increase efficiency and improve processes. We heard about how the company has used time studies and process standardization to ensure products are made in both a timely manner and with high quality. Thanks to everyone that came to the event, and we are looking forward to many more exciting tours and activities this year!
